

REG11

RESISTIVITY METER 2011

DESCRIPTION

REG11 is a semi-automated bench to measure conductor sample's resistivity such as carbon. Sample are cylindric shaped with diameter between 40 et 60mm and height at 70, 100 or 140mm.

This measurement bench is composed by two distinct entities :

- a REG11 resistivimeter with is the "AI" of the bench
- a REG11 press which is a safe enclosure equipped with a press and 3 measurement jacks, piloted by the resistivimeter.
